

*Farmer
Anderson*

Subject to Alteration Without Notice

OCTOBER, 1941

Farmer Anderson Says:—

Good rains are about—so this is the time to get busy with your spring sowings. We recommend the following crops:—

JAPANESE MILLET—A most valuable and hardy crop to grow; can be grazed when it attains a height of six inches. **SUDAN GRASS**—exceedingly drought-resistant and very hardy. **SORGHUMS**—such as Saccaline, Early Orange, White African, Early Ambercane are amongst some of the best summer crops to grow. Their drought-resisting properties, their large yields and their fattening qualities make them a most valuable crop for the dairyman. We only handle South Coast grown seed—it is recognised as the most reliable. **SEED MAIZES**—always in great demand.

We have complete stocks of all these lines. Send us your order now—the prices are shown on this list.

ANDERSON & CO. PTY. LTD.

Seed and Plant Merchants

HEAD OFFICE: 84-90 PARRAMATTA RD., SUMMER HILL, N.S.W.
